ESTR1002 Fall 2025

Lab Exercise #1

Due: 10 Sept 2025

Separate your answer for each question in a different .c file. Compress all files into a .zip and submit it to Blackboard.

Question 1

Write a C program to print the following message on the screen. The sample output is shown as follows.

```
Hello world!
Welcome to ESTR1002!
```

Question 2

Write a C program to read the radius of a sphere from the user and then print out the sphere surface area and volume on the screen. The sample output is shown as follows (the underlined characters are the inputs from the user).

```
Please enter the radius: 2.57
Area: 82.9998
Volume: 71.1032
```

This is a typing exercise. The program code is given as follows.

```c
#include <stdio.h>

int main( void ) {
    const double PI = 3.1416 ;
    double radius , area , volume ;

    printf( "Please enter the radius: " );
    scanf(  "%lf" , & radius );

    area   = 4.0 * PI * radius * radius ;
    volume = area * radius / 3.0 ;

    printf( "Area: %.4lf\n"   , area   ) ;
    printf( "Volume: %.4lf\n" , volume ) ;

    return 0 ;
}
```

Question 3

Write a program that prints out a simple ASCII art (shown below). The grey dots represent whitespaces.
